

Women Rock London Testimonials

"I have struggled to find the words to express how grateful and inspired I am by the Girls Rock London team and how much the experience meant to me. If I was an economist I'd lay out the investment and return as unparalleled. I have never been in an environment as supportive, encouraging and uplifting as that at GRL. **I think I've learnt more about music and creativity than any music or art class in the formal education system.** Every member of the team blew me away with their approachability, friendliness, knowledge and skill, encouragement and guidance."

"PURE UNADULTERATED JOY THANK YOU!!!!

I started the camp assuming I would fail yet finished the camp with a **sense of achievement and success I had never felt before.**"

"SO so so so so impressed by the energy of all the incredible women involved in the camp, and very grateful for everything they gave us. I wasn't expecting such brilliant instrument tuition. **The lessons filled me with joy and confidence in playing my instrument which I will continue to play!!** I'm not used to group workshops, but the team made me feel totally comfortable and happy to participate in the activities. The weekend was very well structured, organised, supportive and friendly from start to finish. It was great to have the gig as a focus. I want to do it all over again!"

"I came to camp thinking I was going to learn more about an instrument; what I really learned was **how much potential I had as a musician and how it increased through collaboration.**"

"The Women Rock London weekend camp was honestly the most inspiring, incredible experience I've had in YEARS. I've wanted to learn to play the bass since I was in high school but I never had the guts to do it. **I was afraid of not being good enough, and instead I was always in the crowd cheering on the (mainly) boys that I hung out with.** Standing on that stage, was so frightening but so life-affirming! And I had such a great time with my band; we laughed SO MUCH!"

"It was the most exhilarating and inspiring weekend of my life. I never want this feeling to end. **I just want to keep creating and performing music.**"

"I never thought I'd ever get the chance to play an instrument and now not only do I do that, **I am part of a community of wonderful women supporting each other in our, post-camp musical journeys.**"

"The weekend was so intense; the group of women I met became my sisters, the space and environment was so supportive and trust worthy. I don't want it be over, I want to keep going and do it all again. **If you have never had the confidence or the drive to pick up and instrument you wanted to, this place will give the platform, the people and the beautiful community to do it in.**"
